## MARINE SOLUTIONS THAT WORK FOR YOUR BUSINESS.

No matter whether you are an experienced boater looking for a replacement pump or a manufacturer looking for solutions for your marine application, we are prepared to provide you with the support you need. And no matter where you work or live, access to our products, services, spare parts and support are never far away. In fact, you will find SPX represented in every major industrial country of the world today and in more

than fifty nations altogether.

It's hard to find a more comprehensive portfolio of marine equipment anywhere else. Many of our designs incorporate patented features and our research and development efforts continue to produce groundbreaking technologies. You get more than a product - a listening partner. We can even customise marine solutions for your business.

# 2010 New Products

## AquaT Standard Electric State-of-the-art marine toilet

The porcelain bowl AquaT standard electric toilets combine ease of installation with electric flushing and one touch control panel.

## AirV Extra heavy duty radial blowers

Marine ventilation blowers that are designed for engine compartment ventilation prior to start up. AirV heavy duty blowers are designed for continuous duty and can therefore be used for air intake or extraction in bilges, galleys, accommodation and other compartments.

## CM90 Heavy-duty circulating pump

A magnetic drive seal-less pump with 20 or 38 mm ports, designed for a maximum flow of 65 or 115 litres. The CM90 circulation pump has been developed primarily for heating and cooling applications in buses, trains and boats, but it is much more. In closed systems or wherever else self-priming is not required, the CM90 is an all-round pump that distinguishes itself for its dependability, capacity and long service life.

## Low Boy Bilge Pump

Low profile pump design for ease of mounting and removal in tight bilge areas. Perfect for vessels with bilge pumps mounted beneath inboard or I/O engines. Removable cartridge style. For L550 LB we have easy-to-install Dura-Port discharge ports to eliminate stress cracking caused by over-tightened hose clamps. The pumps will be delivered including both a straight and a 90° smooth elbow Dura-Port.

## AquaH Marine Water Heaters

Stainless steel water heaters with dual heating as standard - electrical heating and indirect heating based on a second heat source, for example based on the cooling system from the Marine engine or generator set.

## Viking Compact Full-capacity, hand- powered bilge pump

When you need to bail water from the bilge at sea, you need to be able to rely on the pump at hand. Thanks to the Viking Compact manual bilge pump's well considered design, bailing has never been easier. Perfect for installation in tight spaces, the Viking Compact can be mounted wherever it's most appropriate.

## SPX Flow Technology Australia Pty Ltd

In 2010, we changed our name from Johnson Pump (Australia) Pty. Ltd. to SPX Flow Technology Australia Pty Ltd. All of the quality products you know from the Johnson Pump catalogue remain strong and we look forward to augmenting these with other quality brands from the SPX portfolio

SPX Corporation is a Fortune 500 multi-industry manufacturing leader, headquartered in Charlotte, North Carolina. With 15,000 employees and a presence in over 40 countries, we offer highly specialised engineered solutions to solve critical problems for customers.

SPX serves a wide range of industries from dairy, food

and beverage to personal care, pharmaceutical, power, chemical and petrochemical with the resources from its global footprints.

Through SPX's integrated solutions and technology you can benefit from SPX's other well know brands such as Waukesha Cherry-Burrell, Bran+Luebbe, Plenty, Johnson Pump, Lightning, Copes-Vulcan amongst others.

The SPX product portfolio include pumps, valves, heating and cooling systems, homogenisation, mixing and metering equipment amongst other key components for your business.

Contact us now to find out how SPX can serve you.

## Market Breakdown

- Products Re-Aligned to Primary Markets
- Expands Product Portfolio and Provides Platform for Additional Product Pull Through
- Increases Relevance for Key End Users and Channel Partners
